Barbara:

Following Jennifer and Maria's comments, I am attaching a significantly edited version of my original write up as Appendix I (w. track changes and CLEAN) and the previous Appendix as Appendix II. Additionally, following what I sent you late yesterday evening, I felt you could truncate the discussion on "*Potential for interaction between exogenous formaldehyde exposure and endogenous adduct levels?*". So I am resending that part also again.

Ex. 5 Deliberative Process (DP)

(But we will probably need to meet for satisfactory resolution. Unfortunately I am rather busy today. Tomorrow is possible but I need to leave by 3:00.)

Ravi.
